

The Fear of Dogs

When I was in class-4 that time I experienced many terrifying situation, which developed a fear of dogs in me.

once I was playing with my friend Vaishnavi. She was having many friends, who lived just near her house.

That time I was unknown to her friends. She took me to the home of one of her friend Vasu. We

enjoyed a lot with her there. After some time I went to Vasu's home. The entrance of her home was just like a cave, it was surrounded by darkness

I was not able to see anything there, that time ~~I~~ unfortunately I kept my foot on the tail of a big

black and white dog and as you all know that after that what would have happened? Yes. The dog made me

run away from there, that was a very terrifying situation. From that time I developed a habit in me

of running away from dogs. After some time when I went to a shop for purchasing milk packets, some orange

and brown coloured street dogs started barking on me. At that moment I wasn't knowing that what to do?

So I ran away from there and the dogs also followed me. Finally when I reached home I took a

deep breath, drank a plenty of water and then gone for rest. My Fear was increasing day by day. Still I'm

2020 when I am in class-8, I get frightened

whenever a dog is in front.

This year my maternal Grandfather expired, I am very sad and everything is changing in my life.

As only three person including me live in our house we bought a puppy for security of our house.

Firstly, I picked him up using any cloth but nowadays

I am use to be bitten by him. Day by Day my

Fear of dog is decreasing, and I am happy for this.

This was all about "My Fear of dogs".
